Victorian Skills Plan

for 2025 into 2026

Shared prosperity through skills

The Skills Plan helps Victoria meet its skills needs

Sets out Victoria's skills needs to meet economic, social and environmental priorities

Provides practical information to learners on in-demand jobs in growing economic sectors and education and training pathways into these jobs

Advises on the digital skills and other skills needed to work with artificial intelligence (AI) and advanced technologies

The Skills Plan supports Victoria's growth sectors

Housing agenda

Big Build

Construction

Victorian Economic Growth Statement

Victorian Industry Policy

Digital technologies

Health technologies and medical research

Advanced manufacturing and defence

Agribusiness

Clean economy

The Skills Plan provides advice on the skills needed to thrive in a technology-driven world

SKILLS NEEDS

- Most workers need foundation digital skills e.g. internet literacy

- Many workers need industry-specific digital skills e.g. project management software
- Tech workers need advanced digital skills e.g. cloud computing

- Creativity and critical thinking skills are needed alongside digital skills

SKILLS SOLUTIONS

- Flexible and responsive skills system
- Up-skilling and re-skilling through micro-credentials and skill sets

- Greater industry investment in training workers

- Embedding new technologies, including AI, in teaching practices
